# About Us:

Sage11: Sustainable Packaging Solutions

Our mission is to create sustainable packaging that puts the planet first. Our product range is made from renewable materials that are certified compostable.

Our packaging enables businesses to divert their food and packaging waste from landfills and convert it into nutrient-rich compost. We combine innovative material design with a business model that is responsible and sustainable to create a truly regenerative brand, one that makes products that are as safe and healthy for people as they are for the environment.

# How It's Made?

Residual sugarcane called 'Bagasse' is churned and made into a pulp. With the help of high temperature and pressure, this pulp is moulded into high-quality tableware. SAGE11 tableware is 100% compostable and can decompose in your backyard home compost.

Bagasse Tableware

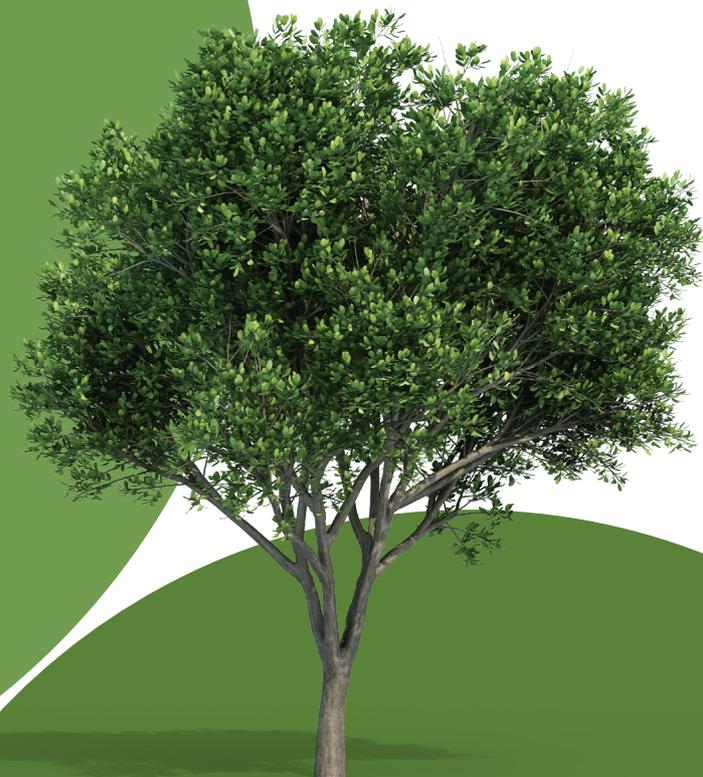

100% Compostable

# GO CIRCULAR

The traditional economic model is linear and can be simplified as having three basic stages: take, make and waste. SageII is committed to disrupting this outdated model and investing in a waste-free future – where innovative design and corporate responsibility intersect to create a circular, and regenerative economy.

## Plant-Based Raw Materials

Our plant-based products are designed to minimise the impact on our environment at each stage of their life cycle, using sustainable and rapidly renewable materials. The footprint of these renewable materials is significantly smaller than that of traditional plastics derived from fossil resources.

## The End is Just the Beginning

Our products are designed to turn into compost – a new, valuable and locally produced resource at the end of their useful life. A thin layer of compost can mitigate climate change by improving the soil's ability to stabilise carbon and by increasing plant growth, which pulls more carbon dioxide out of the atmosphere.

# Earthen Clay Water Bottle

Our natural and environmentally friendly earthen clay water bottles are crafted from pure terracotta, which naturally cools the water while preserving its non-acidic qualities. Designed for modern convenience, it is spill-proof, travel-friendly, and eco-conscious. Its elegant brown hue, achieved through traditional baking, adds a touch of natural beauty to the hydration routine.

## What sets our terracotta bottle apart?

---

### ★ **Authentic Terracotta:**

It is crafted with precision and accuracy using indigenous methods, ensuring consistent quality and appearance for each bottle.

### ★ **Travel-Friendly:**

It comes in a handy 800ml size and is designed to fit any standard car cup holder or backpack.

### ★ **Environmentally friendly:**

This plastic-free product is made from 100% pure terracotta.

### ★ **Spillage-Free Design:**

Unlike other clay bottles with plastic caps that may leak and cause contamination, this bottle features an entirely spillage-free terracotta cap with a food-grade silicone ring.

### ★ **Health Benefits:**

our clay bottle not only cools down water naturally but also keeps it non-acidic, gentle on the throat, and prevents sunstrokes. It also improves metabolism and helps in curing acidity and gastric problems.
